

## FENSTRO

A skylight is a cold room window designed to provide ventilation and light for uninhabited and unheated loft spaces. For inhabited roof space you should really use a roof window.

Skylights are produced with a 14 mm double glazed pane to improve insulation. It comes with integrated flashing so you do not need to buy a separate installation product. The flashing fits perfectly on tiles and slates too. After removing or trimming the foam gasket you can install the skylight perfectly on to slate too.

### Features

- Integrated flashing with apron
- Trimable or completely removable foam gasket to ensure a perfect seal to roofing
- The product can be installed in all common roofings up to 90 mm profile height
